

Birmingham, Ala. – October 28, 2010 - Executive Technologies, Inc., the developer of SearchExpress Document Management software, today announced the entire family of SearchExpress products can be integrated into Kyocera's HyPAS enabled multifunctional products (MFPs), allowing users to capture, index, route, search and manage paper and digital documents.

SearchExpress reduces time spent finding, copying and organizing paper and digital documents by organizing them with user-defined indexes. End users can search documents using a PC, laptop or mobile device. Leveraging Kyocera's HyPAS, SearchExpress users can scan and index documents from the Kyocera MFP's touch screen display.

"SearchExpress provides full enterprise content management capabilities including document capture, search, workflow, version control, document retention and an audit database for HIPAA and regulatory compliance," said Jim Geer, President of Executive Technologies. "By leveraging Kyocera's HyPAS platform and DMS Link technology we can easily integrate SearchExpress into any HyPAS enabled Kyocera MFP. The flexibility of Kyocera's MFPs and our SearchExpress software gives end users options of using Microsoft SQL, Microsoft SharePoint, or our own proprietary SearchExpress database."

SearchExpress was designed to be integrated into Kyocera MFPs using Kyocera's HyPAS solutions platform. HyPAS is a powerful and scalable software solution platform that optimizes the performance of Kyocera's award-winning MFPs through custom, integrated software applications that are designed to meet and exceed users' specific document imaging needs. HyPAS transforms Kyocera MFPs into resources designed to evolve as business needs evolve – resulting in enhanced information sharing, resource optimization and an improved pre-existing, as well as future document workflows.

DMS Link is Kyocera's document capture software. DMS Link allows users to route an OCR'd PDF and an accompanying XML file to most document management systems in the market today. In addition to routing documents to document management systems, DMS Link also supports folder browsing.
